Kristin Branson

Senior Group Leader

kristinbranson@gmail.com | https://www.janelia.org/lab/branson-lab
kristinbranson | Kristin Branson | @kristinmbranson

Summary

I develop new and impactful ways to use computer vision (CV) and machine learning (ML) to gain insight into scientific questions. I do this by 1) finding new scientific questions that can be framed as CV&ML problems, 2) engineering practical and integrative solutions, and 3) making these systems usable by others so that these methods are broadly adopted and applied to new problems. I was a pioneer of video-based analysis of animal behavior, and my work helped establish this as an important and ubiquitous technique in neuroscience and biology more generally.

Education

University of California, San Diego — *La Jolla, CA*
Ph.D., M.S., Computer Science — *2007,2002*
Dissertation Title: *Tracking Multiple Mice through Severe Occlusions*
Advisers: Serge Belongie and Sanjoy Dasgupta

Harvard University — *Cambridge, MA*
A.B. *Cum Laude*, Computer Science — *2000*

Experience

HHMI Janelia Research Campus — *Ashburn, VA*
Senior Group Leader — *2017-present*
Head of Computation & Theory — *2017-2022*
Group Leader — *2010-2017*

California Institute of Technology — *Pasadena, CA*
Postdoctoral Researcher — *2007-2009*
Advisers: Pietro Perona and Michael Dickinson

NASA Intern
Graduate Student Researcher — *NASA Ames RC*
Research Institute for Advanced Computer Science — *Summer 2000 & 2001*
Undergraduate Researcher — *NASA Armstrong Flight RC*
NASA Academy Program — *Summer 1999*

Open-Source Software

I lead, co-developed, and co-maintain the following open-source pieces of software:

- **APF: Animal Pose Forecasting Library**, `https://github.com/kristinbranson/AnimalPoseForecasting`, released 2026. Library for training and evaluating transformer-based, generative models of animal behavior.
- **APT: The Animal Part Tracker**, `http://kristinbranson.github.io/APT`, released 2015. Deep-learning-based keypoint tracking software, includes both UI for annotation, training, and inference code.
- **BABAM: The Browsable Atlas of Behavior-Anatomy Maps**, `https://kristinbranson.github.io/BABAM`, released 2017.

- **BIAS: Basic Image Acquisition Software** `https://github.com/FlyVirtualReality/BIAS`, released 2012. Video acquisition software with plugins for real-time computer vision. 76 releases.
- **JAABA: Janelia Automatic Animal Behavior Annotator**, `http://jaaba.sourceforge.net`, released 2012.
  - Supervised-machine-learning-based behavior classification, designed for efficient labeling and training by biologists, including active learning.
  - First open-source animal behavior classification system used by many biologists.
  - Early example of user-trainable ML system and active learning.
  - 14K downloads from SourceForge. Distribution via GitHub not tracked (31 unique cloners over 23 Aug – 5 Sep 2026 $\rightarrow$ 800 for 2026). 738 citations, 1,000 messages on mailing list.
- **Ctrax: The Caltech Multiple Walking Fly Tracker**, `http://ctrax.sourceforge.net`, released 2008.
  - Computer-vision-based multi-animal tracking software, designed to be usable by biologists, including visualizations of parameters to help users tune to their setup.
  - First open-source animal-tracking system used by many biologists.
  - 44K downloads since 2011, 871 citations, 57 releases, 1,800 messages on mailing list.

Conferences Organized

- Multi-Agent Behavior Workshop, CVPR, June, 2022.
- 4D Cellular Physiology Reimagined: Theory as a Principal Component, September, 2021.
- Janelia Conference: Women in Computational Biology, November 2019.
- Bioimage Computing Workshop, CVPR, June 2019.
- Society for Neuroscience Virtual Conference on Machine Learning, June 2019.
- Janelia Junior Scientist Workshop on Machine Learning and Computer Vision, April 2019, October 2017, October 2016, October 2015.
- Janelia Conference: What Can Machine Learning Do for Neuroscience and Vice-Versa?, November 2010.

Honors and Awards

- Selected as one of Cell's "40 under 40" scientists in commemoration of their 40th anniversary, 2015.
- Faculty of 1000 Recommendation for JAABA, 2013.
- NASA Graduate Student Researcher Program Fellowship, 2003-2006.

Funding

HHMI Janelia is philanthropically funded and lab heads are generally not allowed to apply for grants. Group Leaders re-apply for funding every 5–7 years, and are provided funding for all research for their next term.

- HHMI Janelia Group Leader 1 lab funding: $0.7M / year x 4 years = $2.8M, 2010
- HHMI Janelia Group Leader 2 lab funding: $1.2M / year x 5 years = $6M, 2014
- HHMI Janelia Senior Group Leader appointment: $1.6M / year x 7 years = $11.2M, 2019
- HHMI Janelia Senior Group Leader reappointment: $1.7M / year x 4 years = $6.8M, 2026
- HHMI Scientist Pathways Grant (post-Janelia research funding): $3M, 2026

Scientific Leadership

- Led a lab from 2010-present.
- Established the Computation and Theory Research Area at Janelia (10 labs).
  - Served as inaugural Head from 2017-2022.
  - Set the overall vision and direction for computational research at Janelia
  - Recruited, made hiring and renewal decisions, and set budgets for Group Leaders
  - Initiated development of Janelia's GPU cluster
  - Initiated Janelia's Theory Fellow program

  - Started and co-organized the Computation and Theory Seminar series
- Member of Janelia Senior Leadership, 2017-2022. Participated in institute-wide planning and decision-making.
- Co-created the Janelia Diversity, Equity, and Inclusion Committee, 2018. Chaired committee 2018-2020. Participated 2020-2022. As part of this committee, we researched and proposed initiatives including establishing an Ombuds office, invited speakers and ran a reading group.
- Started, co-organized, and contributed to Computer Vision and Machine Learning weekly reading group and internal seminar series at Janelia, 2014-present.
- Participated in and led a Women and Non-binary Scientist Mentoring Group at Janelia, 2018-present.

Outreach

- Directed the Cajal Machine Learning for Neuroscience Summer School (Summer, 2023).
- Taught classes on quantitative analysis of fly behavior at the Marine Biology Lab (June-July, 2022) and Howard University (September-November, 2022).
- Started and organized "Hour of Code" bi-monthly outreach activity for Janelia scientists to share their enthusiasm for and the impact of programming with grade-school children at local elementary schools and libraries, 2017-2020. This was the first student outreach activity at Janelia, and instigated Janelia to build a Community Relations group to support future efforts.
- Worked with high school teachers at Loudoun Academies of Science to develop a machine learning course for high school students, 2018. This was the seed for a Loudoun-County wide course now at many high schools.
- Participated in "Raising Excitement for Science, Engineering, and Technology" (RESET) Education Outreach Program, 2018-2020, program organized by lab member Alice Robie, 2018–present.
- Taught/mentored in several summer and winter schools, including FENS, Cajal, Cold Spring Harbor, Jackson Laboratory, FLiACT, BAMB, Friday Harbor, Neuromatch. Example Colab notebooks developed for this purpose: `https://bit.ly/jaxpose`, `https://github.com/kristinbranson/roshambo_transformer`.

Mentorship

Name	*Years in lab*	*Degree received*	*Next position*
Alice Robie	2010-present		Senior Scientist in my lab
Mayank Kabra	2011-2013		Machine learning consultant, Kabra Consulting
Marta Rivera-Alba	2013-2016		Head of Data Science at Causal Foundry
Nakul Verma	2013-2017		Professor, Computer Science, Columbia U.
Kelly Seagraves	2015-2016		Senior Advisor in the U.S. Department of State's Office of the Special Envoy for Critical and Emerging Technology
Roian Egnor	2015-2026		Head of IACUC, HHMI Janelia
Iljung (Sam) Kwak	2015-2023	PhD, CS, UCSD, 2019	3D Machine Learning Engineer at Nuwa
Jiwoong (Daniel) Im	2016-2020		PhD student, CS, NYU
Rutuja Patil	2017-2024		Software Engineer in Edge Computing
Ivan (Felipé) Rodriguez	2017-2018	MS, CS, U. Puerto Rico, 2019	PhD student, Cognitive Science, Brown
Lingqi Zhang	2023-present		Theory Fellow with my lab
Aniket Ravan	2024-present		Machine Learning Researcher in my lab
Eyrun Eyjolfsdottir	2024-present		Machine learning consultant
Kai Horstmann	2025-2026		PhD student, CS, Cornell
Yijia Dai	2025-2026		PhD student, CS, Cornell
Manan Lalit	2026-present		Machine Learning Researcher in my lab

Over half of my mentees have been from groups historically marginalized in STEM. As a Senior Group Leader at Janelia, I also provide mentorship and advice to more junior Group Leaders.

Outside the lab

- I love rock climbing, hiking, and generally being outside in the sun. My favorite is brainstorming zany machine learning and science ideas while doing these activities with other scientists.
- I enjoy word puzzles, particularly crossword puzzles.
